INNOVATION
AND EXPERTISE

10th International TWI / EWI Conference on Joining of Aerospace Materials

Event Information

Overview

This seminar follows on from the previous successful events at Rolls-Royce (Derby, UK), Lockheed Martin (Denver, USA), Volvo Aero (Bokenas, Sweden), Airbus (Toulouse, France), GE Aviation (Cincinnati, USA), MTU (Munich, Germany), Boeing (Seattle, USA), ESA, (Noordwijk, The Netherlands) and Moog (Buffalo, USA) in previous years.

It will concentrate on joining requirements and technologies for the aerospace industry, and feature presentations in the field of welding & joining developments for fuselage materials (metallic and non-metallic), welding developments for engine materials, Additive Manufacturing developments, coatings developments, developments in Non-Destructive Inspection and innovative technologies for future aircraft.

Venue

The event will be held at The Learning and Development Centre, Rolls-Royce Plc in Derby, UK.

Travel information

The closest airports to Derby are:

East Midlands Airport (9.1 miles)

Birmingham (34.4 miles)

Manchester (45.3 miles)

Derby train station is a 2 minute walk to the designated hotels and the train journey takes 1.5 hours from London St Pancras Station.

There will be a free coach provided to take delegates to and from the venue every day.
