Come and visit TWI's Skills Area at the WeldJoin Expo to learn more about how TWI can meet your training and welding professional needs and participate in the discussions on how we can address the welding skills gap in the UK. There will be a comprehensive programme of talks, presentations and panel discussions around what are the professional welding skills required by industry, what are the career opportunities and progression pathways and how we can work together to address the skills gap.

Talks will include:

- UK Government
- Leading industry professionals
- Key engineering stakeholder groups.
- Leading education training practitioners
- Student apprenticeship groups

The programme will also include presentations from specialist programme areas, including Welding Inspection, NDT, Paint and Pipe Inspection (BGAS) and Underwater Inspection. You will have the opportunity to speak with our subject experts and lecturers to discuss your specific training requirements.

There will also be interactive booths to try TWI's Learning Hub with its online interactive learning materials for welding and inspection, have a go at a Virtual Reality welding simulator and try our NDT assessments and understand how faults and defects are identified. We are proud to work with our sponsors of the Skills Zone – JCB to make this an interactive, engaging and productive day for you at WeldJoin Expo.
