TEES VALLEY INNOVATION ACCELERATOR (TIA)

FULLY FUNDED INNOVATION DEVELOPMENT SUPPORT FOR ELIGIBLE COMPANIES

- Are you a small to medium sized enterprise (SME) operating in the Tees Valley area or the surrounding counties?*
- Is your company focused on innovation and new product development?
- Are you seeking to leverage public funding to help your business realise its ambitions?

If the answer is yes, then your business could be eligible for tailored innovation support delivered by technology experts from TWI and Teesside University.

PARTICIPATING COMPANIES WILL RECEIVE SUPPORT FROM TWI'S TECHNOLOGY INNOVATION MANAGEMENT TEAM WHO CAN:

- Help you turn your innovative idea into a new product that has the potential to attract collaborative public grant funding
- Bring together a consortium of experts from TWI's Industrial Membership base and innovation networks to work with you on developing your concept and taking it to market
- Provide advice and guidance on writing proposals for public grant funding bids
- Manage the end-to-end process from consortium building through proposal development to the final submitted bid

WORKING WITH TEESSIDE UNIVERSITY, OUR PRODUCT PROTOTYPING TEAM CAN SUPPORT YOU WITH:

- Key enabling technologies in fuel cells, low carbon energy systems, net zero carbon initiatives, additive manufacturing, sensors and IoT, virtual and augmented reality, robotics and autonomous systems, prognostic maintenance, artificial intelligence and machine learning, and multipurpose offshore platforms to realise the proof-of-concept or prototype of your idea
- The development of smart products, bringing together physical components with sensing and actuating elements as well as computing devices and connectivity
- Facilities for manufacturing including inkjet 3D printing and micro-milling

BRING NEW PRODUCTS TO MARKET

Don't delay if you would like to discuss taking up this opportunity to accelerate your business's innovation activities.

Email us today

via tia@twi.co.uk, and a technology expert will be in touch to explain more about this tailored innovation support.
